

11
CLAIMS

1. An open mesh vehicle door comprising a substantially rigid frame member further comprising at least one removable hinge member for pivotally affixing said frame to a vehicle and a latch means for securing said frame member; and an open mesh webbing fixedly attached between at least two opposing sides of said frame member.

2. The open mesh vehicle door of claim 1 wherein said door is a full door.

3. The open mesh vehicle door of claim 2 wherein said door further comprises a screen on the upper half of the door.

4. The open mesh vehicle door of claim 2 wherein said door further comprises at least one pocket on the inner portion of the door.

5. The open mesh vehicle door of claim 2 wherein said door further comprises an armrest on the inside of the door.

6. The open mesh vehicle door of claim 1

wherein said door is a half door.

7. The open mesh vehicle door of claim 6 wherein said door further comprises at least one pocket on the inner portion of the door.

8. The open mesh vehicle door of claim 6 wherein said door further comprises an armrest fixedly attached to the inner portion of the door.

The open mesh vehicle door of claim 1 wherein said webbing comprises a solid piece of material having open areas.

9. The open mesh vehicle door of claim 1 wherein said webbing comprises juxtaposed strips of material connected at each intersection.

10. The open mesh vehicle door of claim 1 wherein said webbing comprises a solid piece of material having open areas.

11. The open mesh vehicle door of claim 1 wherein the method for connecting said material is selected from the group consisting of sewing,

13

riveting, heat bonding, chemical bonding a
installing snaps.

12. The open mesh vehicle door of claim 11
wherein said mesh is connected to said frame
member by a method selected from the group
consisting of, sewing, riveting, heat bonding,
chemical bonding a installing snaps.

13. An open mesh vehicle door comprising a
substantially rigid frame member further
comprising a plurality of removable hinge members
for pivotally affixing said frame to a vehicle at
a first end of said frame member and a latch means
for securing said frame member to a vehicle at a
second end; and an open mesh webbing fixedly
attached between at least two opposing sides of
said frame member.

14. The open mesh vehicle door of claim 13
wherein said removable hinge is a gravity hinge.

15. The open mesh vehicle door of claim 13
wherein said door has an additional frame member
for accommodating a window.

16. The open mesh vehicle door of claim **15** wherein said window comprises translucent material.

17. The open mesh vehicle door of claim **15** wherein said window comprises a screen.

18. An open mesh vehicle door comprising a substantially rigid frame member further comprising a plurality of removable gravity hinge members for pivotally affixing said frame to a vehicle at a first end of said frame member and a latch means for securing said frame member to a vehicle at a second end; at least one upper frame member for accommodating a window thereby creating a full door; and an open mesh webbing fixedly attached between at least two opposing sides of said frame member.

19. The open mesh vehicle door of claim **18** wherein said window comprises translucent material.

20. The open mesh vehicle door of claim **18** wherein said window comprises a screen.
